

PRIMAVERA

ADVANCED TECHNOLOGICAL SERVICE

THE COMPANY

Prima Vera is an Italian company:

- national benchmark in advanced technology services;
- leader in northern Italy in energy field in medical centers.

Established in 2000, Prima Vera is an Italian company providing integrated technological services in the energy, biomedical, public lighting, plant sanitation and facility management sectors.

It started out in the Italian energy sector, investing mainly in thermal power plant efficiency improvements.

In 2002, the Biomedical Division was created to provide Global Service management solutions for biomedical equipment to hospitals.

In the following years, Prima Vera evolved into an ESCO company, investing in energy efficiency and the construction of co-generation, tri-generation and district heating plants.

THE COMPANY

In 2012, set up a public lighting service within the Energy Division. Meanwhile, it also created a division specializing in plant sanitation to address the biological risk represented by the bacterial contamination of HVAC and water systems.

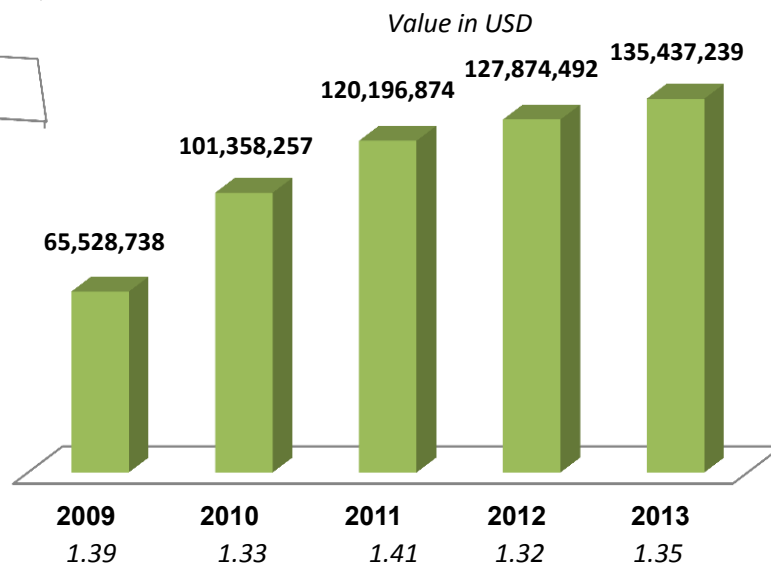

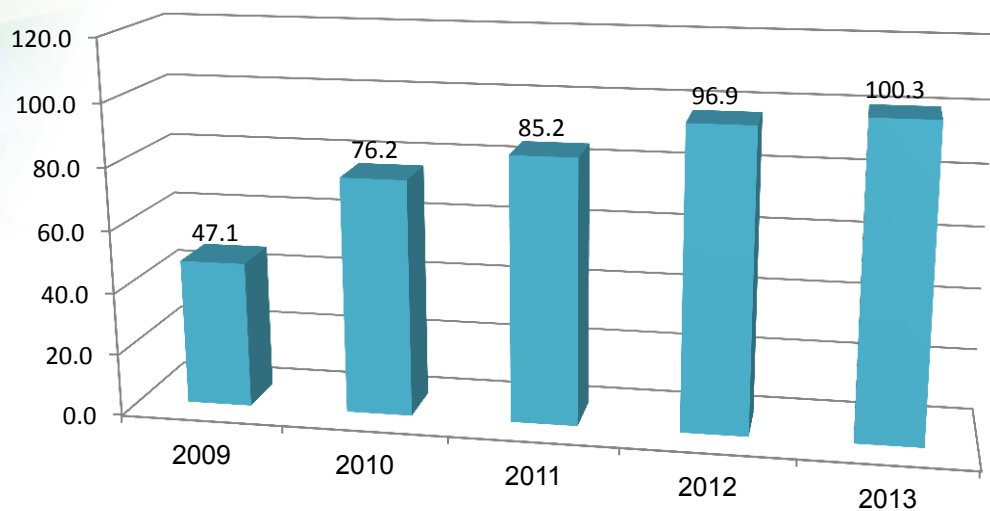

In 2013, started its international expansion in Israel, in North America and in Europe,

During 2014, to keep up with its growth, the company bolstered its technical, financial-administrative and commercial departments..

On 4/9/2014, The European Commission officially started the procedure to finance the first research project submitted and coordinated by Prima Vera (HORIZON 2020 – STEER), which will involve 5 universities as well as 3 private companies.
